Gmail	Enter Login Credentials: Email ID Password Sign in

## Step 2. Generate G Suite App Password

- Sign in to your Gmail account and visit https://myaccount.google.com/
- Click on the Security option and enable 2-step verification
- After enabling 2-step verification, click on the Security option and select the App Password
- Log in to your Gmail account and select the Other (custom name) as an app option
- Enter SysCurve Gmail Backup Tool and click on the Generate button

**Step 3.** Select Folders you want to export and choose PST as an Export option. Select Create Logs checkbox, click on the Browse button and provide a path to save the log file. Click on the Browse button and provide a path to save the PST file. Click on the Next button to start the backup process.
