# Steps to Convert MBOX to PST
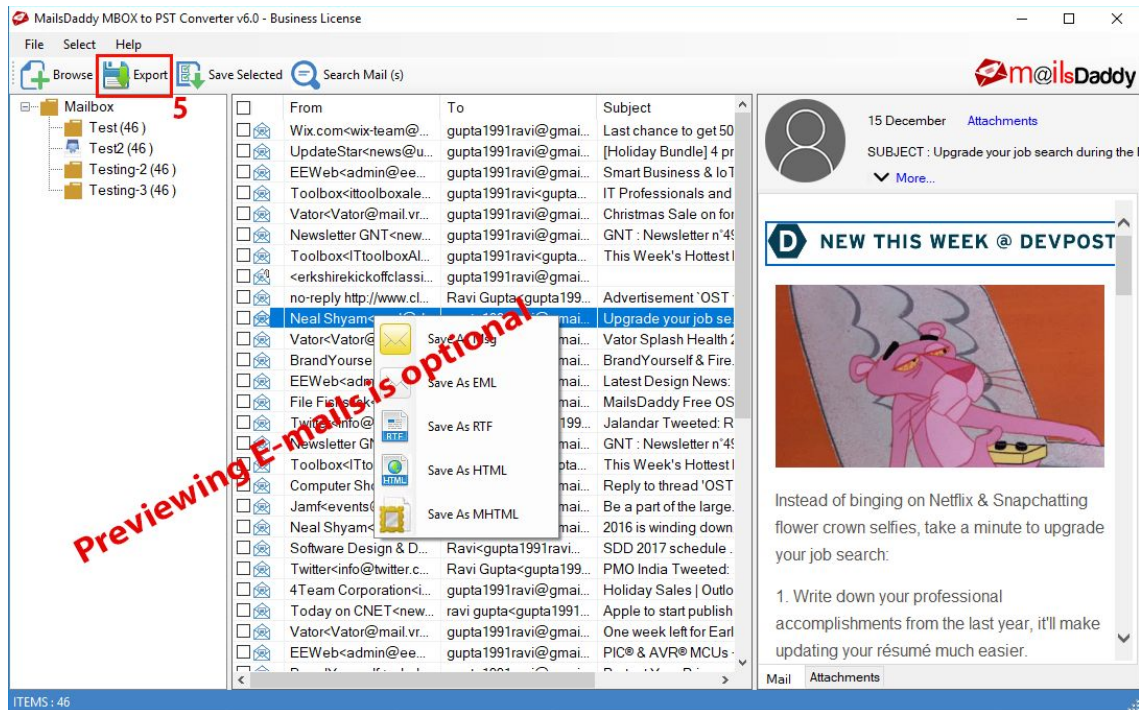

Step 1. Click on the Browse option to add the MBOX file.

1. **Add MBOX Files(Browse Folder):** Use this option to add the MBOX file folder.
2. **Mozilla Thunderbird/Postbox:** Use this option, if you want to convert Mozilla Thunderbird mail file into Outlook PST file format.
3. **Apple Mail:** Select this option to browse folders/mailboxes from MAC OSX

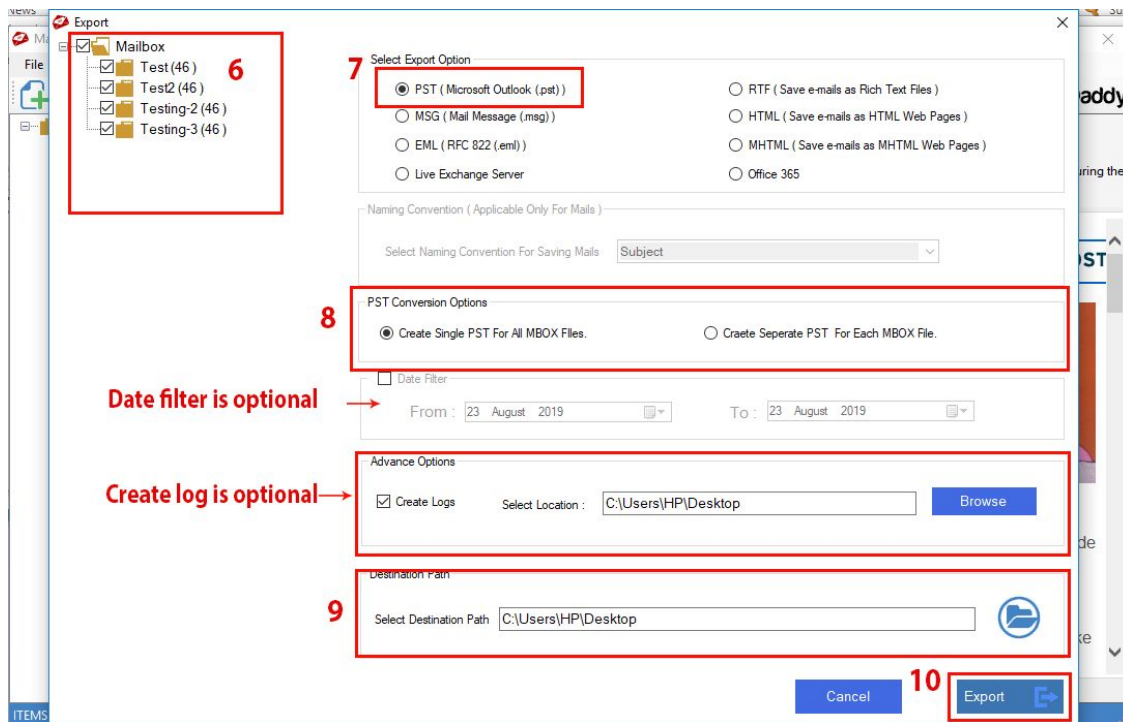

Step 2. Preview the MBOX file
Once the software loads the entire data, then click on any MBOX file to load all the messages.
Click on a message to view the message with attachments. It's an optional process. Now, click on the Export button.
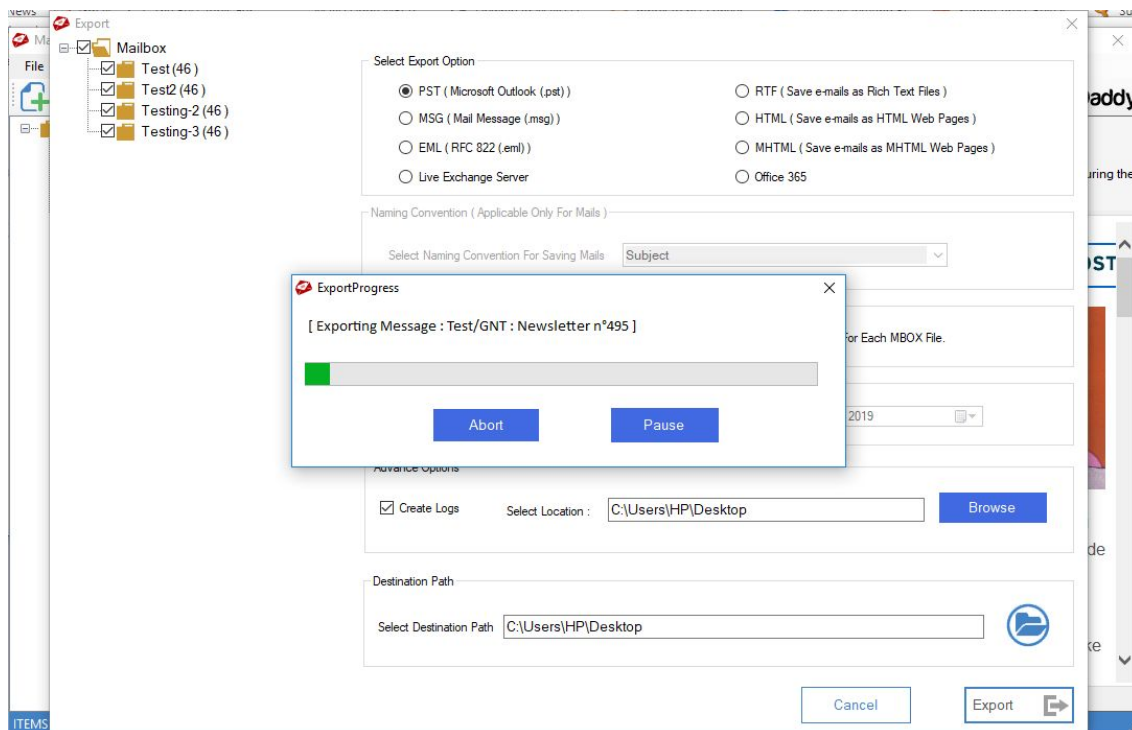

Step 3. From the Export Window select the MBOX files from the tree structure and choose the PST file format. Set filters as per your requirement and provide a path to save the exported file. Click on the Export button.

Create a separate PST for Each MBOX file: This feature creates separate PST files for every MBOX file.

**Create a Single PST file for all MBOX files:** This option merges all MBOX files into a single PST.

**Step 4.** Wait until the process completes.
