

WORKING GUIDE

SysCurve ICS to CSV Converter

A practical guide to install the software and complete the core workflow on Windows.

Product page: <https://www.syscurve.com/ics-to-csv-converter.html>

01. Introduction

SysCurve ICS to CSV Converter exports iCalendar files into CSV files for spreadsheet review, calendar import preparation, and record checking.

This guide explains how to add ICS files, preview calendar entries, choose a CSV profile, and save merged or separate CSV output without changing the source files.

02. Key Features

- Converts local ICS calendar files into CSV output for spreadsheet review.
- Provides Default CSV, Google CSV, Outlook CSV, and Apple Calendar CSV profile choices.
- Lets you create one merged CSV file or a separate CSV file for each source ICS file.
- Shows calendar details such as summary, dates, location, organizer, and description before export.
- Processes selected files or folders on the Windows computer without calendar account sign-in.
- Creates new CSV output while keeping the original ICS files unchanged.

03. System Requirements

Requirement	Recommended
Operating System	Windows 7, 8, 10, 11
Processor	Intel or compatible processor
RAM	4 GB minimum; 8 GB recommended for large calendar files
Hard Disk Space	500 MB for installation, plus space for generated output files
.NET Framework	Version 4.7.2 or higher

04. Installation Steps

1. Download SysCurve ICS to CSV Converter from the official SysCurve website.
2. Run the installer and follow the on-screen instructions.
3. Launch the program from the desktop icon or Start menu after installation.

05. How to Use

1. Open SysCurve ICS to CSV Converter.
2. Add individual ICS files or choose a folder that contains calendar files.
3. Preview the loaded calendar items and confirm the selected source data.
4. Select the CSV profile and choose merged output or one CSV per ICS file.
5. Choose the destination folder for the exported CSV files.

6. Start the conversion and open the saved CSV output in your spreadsheet application.
