

WORKING GUIDE

SysCurve MSG Duplicate Remover Tool

A practical guide to install the software and complete the core workflow on Windows.

Product page: <https://www.syscurve.com/msg-duplicate-remover-tool.html>

01. Introduction

SysCurve MSG Duplicate Remover Tool helps clean folders that contain repeated Outlook MSG files.

Use this guide to scan MSG folders, compare messages by useful fields, and remove duplicate copies with a controlled workflow.

02. Key Features

- Scans folders that contain MSG email files and detects duplicate messages.
- Uses message properties such as subject, sender, date, and content to support duplicate comparison.
- Allows review of detected duplicates before cleanup.
- Helps reduce archive clutter and storage usage in exported MSG collections.
- Processes MSG files locally on your Windows computer.
- Supports batch cleanup for large folders of saved Outlook messages.

03. System Requirements

Requirement	Recommended
Operating System	Windows 7, 8, 10, 11
Processor	Intel or compatible processor
RAM	4 GB minimum; 8 GB recommended for large files
Hard Disk Space	500 MB for installation, plus space for output files
.NET Framework	Version 4.7.2 or higher

04. Installation Steps

1. Download SysCurve MSG Duplicate Remover Tool from the official SysCurve website.
2. Run the installer and follow the on-screen instructions.
3. Launch the program from the desktop icon or Start menu after installation.

05. How to Use

1. Open SysCurve MSG Duplicate Remover Tool.
2. Add the folder that stores your MSG files.
3. Choose the comparison fields for duplicate detection.
4. Run the scan and review the duplicate results.

5. Select the desired cleanup or output option.
6. Start removal and verify the cleaned folder after completion.

06. Support
