

WORKING GUIDE

SysCurve OST Email Address Extractor Tool

A practical guide to install the software and complete the core workflow on Windows.

Product page: <https://www.syscurve.com/ost-email-address-extractor-tool.html>

01. Introduction

SysCurve OST Email Address Extractor Tool collects email addresses from OST mailbox files and saves them in usable output lists.

This guide explains how to load an OST file, select mailbox folders, extract sender and recipient addresses, and save the results locally.

02. Key Features

- Extracts email addresses from sender, recipient, CC, and BCC fields where available.
- Supports OST mailbox folders so extraction can focus on selected data.
- Helps create contact lists for review, audit, or migration preparation.
- Exports collected addresses into easy-to-use local files.
- Works without Microsoft Outlook for address extraction tasks.
- Keeps mailbox processing on the local Windows computer.

03. System Requirements

Requirement	Recommended
Operating System	Windows 7, 8, 10, 11
Processor	Intel or compatible processor
RAM	4 GB minimum; 8 GB recommended for large files
Hard Disk Space	500 MB for installation, plus space for output files
.NET Framework	Version 4.7.2 or higher

04. Installation Steps

1. Download SysCurve OST Email Address Extractor Tool from the official SysCurve website.
2. Run the installer and follow the on-screen instructions.
3. Launch the program from the desktop icon or Start menu after installation.

05. How to Use

1. Open SysCurve OST Email Address Extractor Tool.
2. Add the OST file that contains the email addresses you need.
3. Select the folders or mailbox area to scan.
4. Choose the address fields and output location.

5. Start the extraction process.
6. Open the saved output file and review the collected email addresses.

06. Support
