# Steps to Remove Duplicate Emails in Outlook
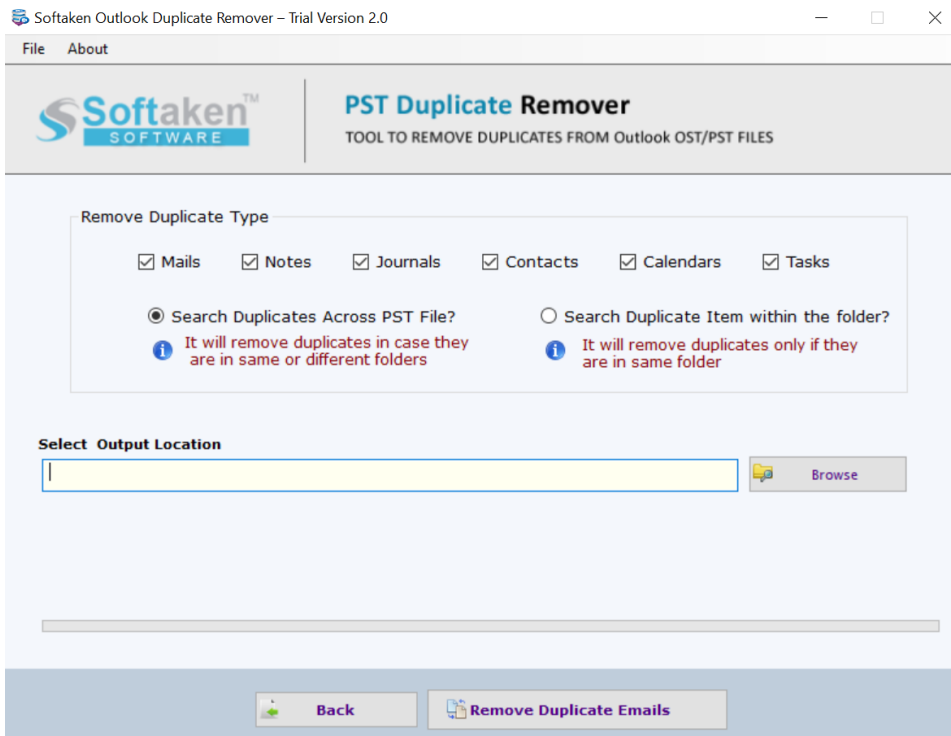

Step 1. Launch the SysCurve Outlook Duplicate Remover tool.

Step 2. Select the Single/Multiple PST File(s) option, click on the Browse button, select PST file and click on the OK button. After that, click on the Next button.

Step 3. Select Remove duplicate type options. After that, choose Search & Remove duplicates across the PST file option.

Step 4. Click on the Browse button, provide a destination path to save new PST, and click on the Remove Duplicate Emails button.
