

WORKING GUIDE

SysCurve PDF Bates Numbering Tool

A practical guide to install the software and complete the core workflow on Windows.

Product page: <https://www.syscurve.com/pdf-bates-numbering-tool.html>

01. Introduction

SysCurve PDF Bates Numbering Tool adds page identifiers to PDF files for legal review, document indexing, and organized case records.

This guide explains how to load PDFs, choose numbering settings, select placement, and create Bates-stamped output files.

02. Key Features

- Adds Bates numbers to PDF pages using a controlled numbering sequence.
- Supports prefix, suffix, and starting number options for organized document sets.
- Lets you choose placement so numbers appear in a suitable page area.
- Processes PDF files locally for offline document handling.
- Creates new output files while leaving the original PDFs unchanged.
- Useful for legal, audit, review, and administrative document workflows.

03. System Requirements

Requirement	Recommended
Operating System	Windows 7, 8, 10, 11
Processor	Intel or compatible processor
RAM	4 GB minimum; 8 GB recommended for large files
Hard Disk Space	500 MB for installation, plus space for output files
.NET Framework	Version 4.7.2 or higher

04. Installation Steps

1. Download SysCurve PDF Bates Numbering Tool from the official SysCurve website.
2. Run the installer and follow the on-screen instructions.
3. Launch the program from the desktop icon or Start menu after installation.

05. How to Use

1. Launch SysCurve PDF Bates Numbering Tool.
2. Add the PDF files that need Bates numbers.
3. Set the prefix, suffix, starting number, and digit length if required.
4. Choose the position where the Bates number should appear on each page.

5. Select the output folder for the numbered PDF files.
6. Start the process and review the completed files.

06. Support
