

# SysCurve PDF Blank Page Remover Tool - Working Guide

---

## Introduction

SysCurve PDF Blank Page Remover detects and removes truly blank pages with a safe two-pass check.

It is designed for scanned PDFs and batch jobs, keeping pages when unsure to protect content.

## Key Features

- Two-pass blank page detection to reduce false removals.
- Checks non-visual content like OCR text and form fields.
- Batch processing with a clear grid view.
- Drag and drop input for fast workflows.
- Safe output naming for organized results.
- CSV report for verification and auditing.

## System Requirements

- Operating System: Windows 7, 8, 10, 11
- Processor: Intel or equivalent

- RAM: 8 GB or more recommended for optimal performance
- Hard Disk Space: 500 MB for installation, plus space for output files
- .NET Framework: Version 4.7.2 or higher

## Installation Steps

1. Download the tool from the official SysCurve website.
2. Run the installer and follow the on-screen instructions.
3. Launch the program from the desktop icon or Start menu.

## How to Use

1. Open SysCurve PDF Blank Page Remover.
2. Add PDFs using drag and drop or Add Files.
3. Choose an output folder for cleaned PDFs.
4. Click Remove Blank Pages and let the batch process.
5. Review the summary and CSV report if enabled.
