

WORKING GUIDE

SysCurve PDF Watermark Tool

A practical guide to install the software and complete the core workflow on Windows.

Product page: <https://www.syscurve.com/pdf-watermark-tool.html>

01. Introduction

SysCurve PDF Watermark Tool adds text or image watermarks to PDF files for branding, draft marks, review labels, or document control.

Use this guide to load PDFs, set watermark text or image options, choose placement, and save watermarked copies safely.

02. Key Features

- Adds text watermarks such as Draft, Confidential, Reviewed, or custom labels.
- Supports image watermarks for logos or visual document marks.
- Allows placement, size, rotation, and transparency settings where available.
- Processes multiple PDF files in one batch workflow.
- Creates new output copies without changing the original PDFs.
- Runs locally for users who prefer offline PDF processing.

03. System Requirements

Requirement	Recommended
Operating System	Windows 7, 8, 10, 11
Processor	Intel or compatible processor
RAM	4 GB minimum; 8 GB recommended for large files
Hard Disk Space	500 MB for installation, plus space for output files
.NET Framework	Version 4.7.2 or higher

04. Installation Steps

1. Download SysCurve PDF Watermark Tool from the official SysCurve website.
2. Run the installer and follow the on-screen instructions.
3. Launch the program from the desktop icon or Start menu after installation.

05. How to Use

1. Open SysCurve PDF Watermark Tool.
2. Add the PDF files that need a watermark.
3. Choose text watermark or image watermark based on your need.
4. Set placement, size, opacity, and rotation options.
5. Choose the output folder for watermarked files.

6. Start the process and check the saved PDF copies.
