

Steps to Split PST File

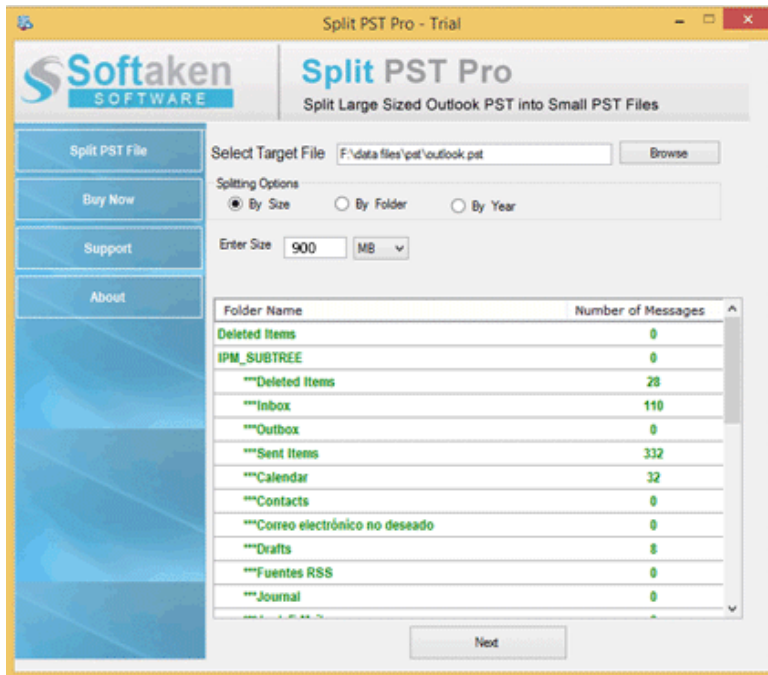

Step 1. Launch the SysCurve Split PST tool.

Step 2. Click on the Browse button, select the PST file you want to split, and click on the Open button.

Step 2: Select By Size as a splitting option. Enter the size and click on the Next button.

Step 3. Click on the Browse button and provide a path to save the Split PST files. Click on the Split Now button to start the split process.
