

## WORKING GUIDE

# SysCurve VCF Duplicate Remover Tool

A practical guide to install the software and complete the core workflow on Windows.

Product page: <https://www.syscurve.com/vcf-duplicate-remover-tool.html>

---

## 01. Introduction

---

SysCurve VCF Duplicate Remover Tool helps detect and remove repeated contacts from vCard files.

This guide explains how to load VCF data, compare contact records, review duplicate entries, and save a cleaner contact file.

## 02. Key Features

---

- Finds duplicate contacts in VCF files using contact details such as name, phone, and email where available.
- Supports review of duplicate results before saving the cleaned output.
- Helps reduce repeated entries before importing contacts into phones, Outlook, Gmail, or other address books.
- Creates cleaned contact output locally on your computer.
- Keeps the workflow simple for personal and business contact lists.
- Useful when contact files have been exported or merged from several sources.

---

## 03. System Requirements

---

Requirement	Recommended
Operating System	Windows 7, 8, 10, 11
Processor	Intel or compatible processor
RAM	4 GB minimum; 8 GB recommended for large files
Hard Disk Space	500 MB for installation, plus space for output files
.NET Framework	Version 4.7.2 or higher

---

## 04. Installation Steps

---

1. Download SysCurve VCF Duplicate Remover Tool from the official SysCurve website.
2. Run the installer and follow the on-screen instructions.
3. Launch the program from the desktop icon or Start menu after installation.

---

## 05. How to Use

---

1. Launch SysCurve VCF Duplicate Remover Tool.
2. Add the VCF file that contains duplicate contacts.
3. Choose the matching fields for duplicate detection.
4. Run the scan and review the duplicate contacts found by the software.

5. Select the cleanup option and output folder.
6. Save the cleaned VCF file and verify it before importing.

## 06. Support

---
