# SysCurve Zimbra to PST Converter -Working Guide

# Introduction

The SysCurve Zimbra to PST Converter is a streamlined, high-performance solution that converts Zimbra TGZ files into Outlook-compatible PST files in just a few steps. It carefully preserves your folder hierarchy, email headers, attachments, and timestamps to guarantee an accurate migration. For added flexibility, you can also export your Zimbra data as MBOX, EML, MSG, or HTML—ideal for cross-platform archiving and collaboration. Its wizard-style interface guides both beginners and experienced IT teams through largescale migrations quickly and reliably.

#### **Key Features**

- Convert TGZ files into a consolidated PST archive in just a few clicks.
- Manage even the largest Zimbra archives without performance slowdowns or data loss.
- Preview emails and attachments in a built-in preview pane to ensure you're exporting exactly what you need.
- Retain critical details—sender, recipients, date/time, subject lines throughout the entire conversion.
- Keep your original Zimbra directory layout intact so your PST reflects the same organization.

- Beyond PST, export TGZ content as MBOX, EML, MSG, or HTML for seamless integration with other mail clients.
- Compatible with all Windows editions and integrates seamlessly with any Outlook version for a hassle-free migration.
